m. Agency Space Problem (continued)

A comprehensive study of the Agency's utilization of space has been prepared and forwarded to Public Buildings Service, GSA. Preliminary analysis indicates that our utilization is well below the standards established by PBS. A draft study, "Future Housing for Headquarters Elements" has been prepared for consideration by the DD/S. Briefly, the study summarizes the Agency's Headquarters space requirements and projects space needs through 1970. It recommends that the DDCI be requested to approve preliminary planning and request the Bureau of the Budget to release \$200,000 from funds remaining in the Headquarters construction appropriation. This amount to be used in planning for construction, refinement of requirements, and selection of appropriate sites in the preliminary planning phase.
